1st International Conference on Automated Production of Cross Media Content for Multi-channel Distribution

Call for Papers

30 November – 2 December 2005
Florence, Italy

www.AXMEDIS.org/axmedis2005

Current developments in the cross media domain require innovative and new technologies to meet the challenges of the marketplace. The AXMEDIS conference combines the activities of the WEBELMUSIC conference series (www.wedelmusic.org) with the AXMEDIS consortium. The AXMEDIS consortium consists of leading European digital content producers, integrators, aggregators, distributors, and information technology companies and research groups involved in content production, protection and content distribution via different channels including interactive TV (i-TV), DVBT, DVBS, personal computer, kiosk, mobile phone, PDA and others.

This event seeks to promote discussion and interaction between researchers, practitioners, developers and users of tools, technology transfer experts, and project managers. AXMEDIS-2005 will bring together a variety of participants from the academic, business and industrial worlds, to address different technical and commercial issues. Particular interests include the exchange of concepts, prototypes, research ideas, industrial experiences and other results.

The conference focuses on the challenges in the cross-media domain (including production, protection, management, representation, formats, aggregation, workflow, distribution, business and transaction models), and the integration of content management systems and distribution chains, with particularly emphasis on the reduction of costs and solutions for complex cross-domain problems. Topics of interest include, but are not restricted to, the following aspects:

- Automatic cross-media production, gathering, crawling, composition, formatting, P2P, etc.
- Formats and models for multi-channel content distribution
- Multimedia standards such as MPEG-7, MPEG-21, DMP, etc.
- Legal aspects related to digital content
- High quality Audio Video Coding
- Multimedia Music representation and formatting
- Watermarking and fingerprinting techniques
- GRID and Distributed systems for Content production
- Multimedia Middleware
- Workflow management systems
- Web services for content distribution
- Distribution with P2P architectures
- Semantic Web and P2P
- Collecting and clearing of rights and licenses
- Formats and tools for Content Aware
- Archives managements for cultural and educational applications
- Digital Rights Management (DRM), models and tools, and interoperability
- Synchronisation technologies and solutions
- Business and transaction models
- Systems and approaches for content production/distribution on demand
- Digital Content User Interface
- Digital Content accessibility
- Payments model
- Novel applications and case-studies of relevant technologies

RESEARCH PAPERS (long and short): Papers should describe original and significant work in the research and industrial practice of related topics. (i) Research studies, applications and experiments are particularly welcome. Papers should be limited to 8 pages in length. (ii) Shorter papers on work-in-progress, interim results, advanced topic position paper are also welcome. Submissions should be limited to 4 pages in length. Document style can be found at the conference website. Accepted papers will be published in the conference proceedings.

APPLICATIONS and INDUSTRIAL Presentations: Proposals for presentations of Applications and Tools are welcome. These include reports on the application and utilisation of tools, industrial practices and models, or tool/system demonstrations. A summary of up to two pages of accepted proposals will be published in the conference proceedings.

PANELS, WORKSHOPS and TUTORIALS: Proposal for panels, workshops and tutorials are invited – please contact conference@axmedis.org for details. AXMEDIS and other Tutorials will be hosted.

ALL submissions and proposals have to be written in English and submitted in PDF format via email to conference@axmedis.org by 20 March 2005. The conference proceedings will be published by the IEEE Computer Society Press. Selected papers from the conference will be considered for publication in special issues of one or more major peer-reviewed Journals in this domain.
