Automating Production of Cross Media Content for Multi-channel Distribution

www.AXMEDIS.org

DE9.6.3
First Prototype up of content production and distribution to kiosks and local PDAs

Version: 1.1
Date: 30-08-2006
Responsible: ILABS (revised and approved by coordinator)

Project Number: IST-2001-37168
Project Title: Automating Production of Cross Media Content for Multi-channel Distribution
Deliverable Type: Public
Visible to User Groups: Yes
Visible to Affiliated: Yes
Visible to the Public: Yes.

Deliverable Number: DE9.6.3
Contractual Date of Delivery: M18
Actual Date of Delivery: 30-08-2006
Title of Deliverable: First Prototype up of content production and distribution to kiosks and local PDAs
Work-Package contributing to the Deliverable: WP9
Task contributing to the Deliverable: all that of WP9.6
Nature of the Deliverable: Accompanying documentation for the related prototype
Author(s): ILABS

Abstract: This document provides the basic information needed to understand the related deliverable that being a prototype cannot be accessed like other reports.
Keyword List: Kiosks, PDAs, Distribution, Application.
AXMEDIS Copyright Notice

The following terms (including future possible amendments) set out the rights and obligations licensee will be requested to accept on entering into possession of any official AXMEDIS document either by downloading it from the web site or by any other means.

Any relevant AXMEDIS document includes this license. PLEASE READ THE FOLLOWING TERMS CAREFULLY AS THEY HAVE TO BE ACCEPTED PRIOR TO READING/USE OF THE DOCUMENT.

1. DEFINITIONS

i. "Acceptance Date" is the date on which these terms and conditions for entering into possession of the document have been accepted.

ii. "Copyright" stands for any content, document or portion of it that is covered by the copyright disclaimer in a Document.

iii. "Licensor" is AXMEDIS Consortium as a de-facto consortium of the EC project and any of its derivations in terms of companies and/or associations, see www.axmedis.org.

iv. "Document" means the information contained in any electronic file, which has been published by the Licensor’s as AXMEDIS official document and listed in the web site mentioned above or available by any other means.

v. "Works" means any works created by the licensee, which reproduce a Document or any of its part.

2. LICENCE

1. The Licensor grants a non-exclusive royalty free licence to reproduce and use the Documents subject to present terms and conditions (the Licence) for the parts that are own and proprietary property the of AXMEDIS consortium or its members.

2. In consideration of the Licensor granting the Licence, licensee agrees to adhere to the following terms and conditions.

3. TERM AND TERMINATION

1. Granted Licence shall commence on Acceptance Date.

2. Granted Licence will terminate automatically if licensee fails to comply with any of the terms and conditions of this Licence.

3. Termination of this Licence does not affect either party’s accrued rights and obligations as at the date of termination.

4. Upon termination of this Licence for whatever reason, licensee shall cease to make any use of the accessed Copyright.

5. All provisions of this Licence, which are necessary for the interpretation or enforcement of a party’s rights or obligations, shall survive termination of this Licence and shall continue in full force and effect.

6. Notwithstanding License termination, confidentiality clauses related to any content, document or part of it as stated in the document itself will remain in force for a period of 5 years after license issue date or the period stated in the document whichever is the longer.

4. USE

1. Licensee shall not breach or denigrate the integrity of the Copyright Notice and in particular shall not:

   i. remove this Copyright Notice on a Document or any of its reproduction in any form in which those may be achieved;

   ii. change or remove the title of a Document;

   iii. use all or any part of a Document as part of a specification or standard not emanating from the Licensor without the prior written consent of the Licensor; or

   iv. do or permit others to do any act or omission in relation to a Document which is contrary to the rights and obligations as stated in the present license and agreed with the Licensor.

5. COPYRIGHT NOTICES

1. All Works shall bear a clear notice asserting the Licensor’s Copyright. The notice shall use the wording employed by the Licensor in its own copyright notice unless the Licensor otherwise instructs licensees.

6. WARRANTY

1. The Licensor warrants the licensee that the present licence is issued on the basis of full Copyright ownership or re-licensing agreements granting the Licensor full licensing and enforcement power.

2. For the avoidance of doubt the licensee should be aware that although the Copyright in the documents is given under warranty this warranty does not extend to the content of any document which may contain references or specifications or technologies that are covered by patents (also of third parties) or that refer to other standards. AXMEDIS is not
DE9.6.3 First Prototype up of content production and distribution to kiosks and local PDAs

responsible and does not guarantee that the information contained in the document is fully proprietary of AXMEDIS consortium and/or partners.

3. Licensee hereby undertakes to the Licensor that he will, without prejudice to any other right of action which the Licensor may have, at all times keep the Licensor fully and effectively indemnified against all and any liability (which liability shall include, without limitation, all losses, costs, claims, expenses, demands, actions, damages, legal and other professional fees and expenses on a full indemnity basis) which the Licensor may suffer or incur as a result of, or by reason of, any breach or non-fulfilment of any of his obligations in respect of this Licence.

7. INFRINGEMENT

1. Licensee undertakes to notify promptly the Licensor of any threatened or actual infringement of the Copyright which comes to licensee notice and shall, at the Licensor’s request and expense, do all such things as are reasonably necessary to defend and enforce the Licensor’s rights in the Copyright.

8. GOVERNING LAW AND JURISDICTION

1. This Licence shall be subject to, and construed and interpreted in accordance with Italian law.

2. The parties irrevocably submit to the exclusive jurisdiction of the Italian Courts.

Please note that:

- You can become affiliated with AXMEDIS. This will give you the access to a huge amount of knowledge, information and source code related to the AXMEDIS Framework. If you are interested please contact P. Nesi at nesi@dsi.unifi.it. Once affiliated with AXMEDIS you will have the possibility of using the AXMEDIS specification and technology for your business.
- You can contribute to the improvement of AXMEDIS documents and specification by sending the contribution to P. Nesi at nesi@dsi.unifi.it
- You can attend AXMEDIS meetings that are open to public, for additional information see WWW.axmedis.org or contact P. Nesi at nesi@dsi.unifi.it

1 Executive Summary and Report Scope
The present document represents the accompanying document of the prototype named DE9.6.3 Content production and distribution to Kiosks and local PDAs. Aim and purpose of the present document is therefore to provide a basic supportive documentation to describe the prototype.

2 Introduction to the Kiosk Demo
The demo covers the two side of the process that is the management of the kiosk and its operation. In more detail there are two sets of interfaces, one related to kiosk management (encompassing, catalogue management at the factory side and user management at the kiosk side) and one related to user fruition.

At kiosk management side is important to take into account that there are two levels one (called the kiosk factory) dealing with content production and catalogue preparation, and one related to local kiosk management (catalogue selection & loading, user management…). In the kiosk factory the distributor (or the people preparing content for kiosk distribution) will take care of selecting the contents that will be presented in the catalogue, assign the proper category, rights and costs to each, prepare and distribute the catalogue.

As far as the user is concerned the application has been designed taking into account the need to accommodate both terminal and PDA fruition, therefore a web-based interface has been designed and implemented. The user should register (and download the viewer whenever needed) prior to be granted access to the application. In the registration phase some demographic data and some preferences are collected for subsequent usage (even though only very little data is mandatory). Once registered the user can access to the core application that will present the kiosk catalogue, where available contents are categorised in respect to usage statistics (top-ten, best picks and offers) yet can be browsed or searched. The user can select content for preview and once the selection is performed the user can purchase the content and, upon process completion, also access to it using the specific player (eventually downloaded in advance).

The initial version was relaying on a loose integration of components (there was the need to have on the same network all the components but they where on separate machines, now a more integrated version including PMS and AXCS on the same machine (kiosk factory / kiosk) have been delivered and demonstrated. The original kiosk application related Postgres DB has been successfully migrated to MySQL and integrated.

2.1 Where to find the demo and other supportive material
The demo application could be found on the project CVS while objects used are to be found in the set of supportive material coming with the Query Support installation pack. Furthermore the Wiki page of the project related to demos provides access to screen based video recording that should support in the process. Hereafter all such references are explicitly reported.

2.2 Where to find the demo and other supportive material
The demo application could be found on the project CVS while objects used are to be found in the set of supportive material coming with the Query Support installation pack. Furthermore the Wiki page of the project related to demos provides access to screen based video recording that should support in the process. Hereafter all such references are explicitly reported.

2.2.1 Demo software location
The software for the demo is to be found on the project CVS (https://cvs.axmedis.org/newrepos/) under the “applications” area (https://cvs.axmedis.org/newrepos/Applications/) and more specifically inside the Kiosk Components section (https://cvs.axmedis.org/newrepos/Applications/kioskcomponents/) which is divided in Factory and Kiosk given the specific nature of the application. References for the two mentioned components are:

- Factory (https://cvs.axmedis.org/newrepos/Applications/kioskcomponents/Factory/)
- Kiosk (https://cvs.axmedis.org/newrepos/Applications/kioskcomponents/Kiosk/)

It is, nevertheless, necessary to take into account that the application demo makes usage of the underlying infrastructure either locally (that is having the AXMEDIS framework installed locally) or remotely (accessing to it via the provided web-services. To this purpose we will also recall that:

- AXMEDIS framework can be found at the address: https://cvs.axmedis.org/newrepos/Framework/
- AXMEDIS web-services can be found at the address: https://cvs.axmedis.org/newrepos/WebServices/

Last but not least it will be necessary to find ready made objects to be used for the testing. Such objects are available at the following addresses:

- Objects included in the Query Support installation:
  https://cvs.axmedis.org/newrepos/Framework/doc/other/axdb/Mysql-4.1.10/SavedObjects.zip
As previously mentioned, supportive documentation and videos can be found both on the project web-site (http://www.axmedis.org) and on the project wiki (http://www.axmedis.org/tiki/).

Videos of the early demonstrations on the portal are to be found at the following download address: http://www.axmedis.org/attivita/documenti/download.php?area_id=1&attivita_id=27&l_s=struttura&gruppo=413&order_by=data&asc_desc=desc where for kiosks can be found:

Videos of the early demonstrations on the wiki are to be found at the following download address:

- Distribution of Content via Kiosks: (http://www.axmedis.org/documenti/view_documenti.php?doc_id=2186)

### 2.3 The overall scenario

What is an AXMEDIS kiosk? Well this is a specialised distribution channel operating at B2C level and covering a quite dispersed set of user needs and activities. In more details it represents a point of service inside an infrastructure that may be spread over the territory with multiple differentiated instances all related to each other in terms provided content (museums kiosk will all deliver content related to the museum net while tourism devoted kiosks will provide content related to tourists activities and interests) with a common usage of technology and distribution tools. Lastly, kiosks will be characterised by the availability of a LAN where will be connected point of services (terminals) and wireless PDA.

How does the kiosk area fit in to the rest of AXMEDIS? The kiosk sits at the Distributors level (as shown in the following figure)

![AXMEDIS Architecture highlighting the Kiosk Area](image)

To deliver AXMEDIS objects using kiosks, there are two scenarios:

**Scenario 1.** In the first scenario a publisher prepares content that wants to distribute on a particular target kiosk set (e.g. museums) via satellite. The publisher needs to select a list of objects, a catalogue template, an object template and specify when to deliver each object (including the catalogue) and to whom (i.e. the distribution kiosk).

**Scenario 2.** In the second (On-Demand) scenario, a user selects a multimedia object in the AXMEDIS Distribution Area. The request from the distribution area starts a series of events behind the scenes where the user sees the object requested.
2.3.1 Kiosk content and catalogue Production & distribution

A publisher prepares content that wants to distribute on a particular target kiosk set (e.g. museums) via satellite. The publisher needs to select a list of objects, a catalogue template, an object template and specify when to deliver each object (including the catalogue) and to whom (i.e. the distribution kiosk). By using the AXMEDIS Query support the publisher searches the desired objects and selects the one to be used to build the catalogue. By using the AXMEDIS Editor and a specific application the publisher produces the catalogue starting form a set of pre-defined templates. By using the P&P Editor the programme manager can create a programme to specify the time and destination channel of the objects to be distributed. On completion, the publisher activates the programme and during the programme life cycle the objects will be distributed until the programme has completed or the programme is removed from being activated.

2.3.2 Kiosk catalogue and content Distribution & fruition

So what happens when a kiosk is used? The user shall register or log onto the kiosk infrastructure to be recognised and authorised to access to provided services. The user will be able to browse the catalogue and select content for delivery and fruition. In this latter phase the user will be able to select also the fruition model (acquisition, rental, pay per use…) and experiment what it looks like a DRM empowered system specifically designed to cover the whole value-chain from production to fruition. As a matter of facts the system will show how only allowed operation can be performed while all others are inhibited.

2.3.3 Conclusion

The kiosk environment shall enable to test basically all components of the AXMEDIS framework partially in the content preparation and primary distribution (that will be performed at Kiosk-Factory level) and partially at end user level during fruition at kiosk level. Moreover this demonstration scenario covers the benefit of satellite based targeted broadcast of “content” proving how it is feasible to achieve a high degree of efficiency and flexibility in “specialised” content distribution on a “geographically-dispersed” environment. At user level this demonstrator will trial solution related to combination of business model merging into a single local infrastructure for content search, selection, acquisition and fruition.
