AXMEDIS ACTIVEX PLAYER USER MANUAL

AXMEDIS COPYRIGHT NOTICE

The following terms (including future possible amendments) set out the rights and obligations licensee will be requested to accept on entering into possession of any official AXMEDIS document either by downloading it from the web site or by any other means. Any relevant AXMEDIS document includes this license. PLEASE READ THE FOLLOWING TERMS CAREFULLY AS THEY HAVE TO BE ACCEPTED PRIOR TO READING/USE OF THE DOCUMENT.

1. DEFINITIONS

- i. "**Acceptance Date**" is the date on which these terms and conditions for entering into possession of the document have been accepted.
- ii. "**Copyright**" stands for any content, document or portion of it that is covered by the copyright disclaimer in a Document.
- iii. "**Licensor**" is AXMEDIS Consortium as a de-facto consortium of the EC project and any of its derivations in terms of companies and/or associations, see www.AXMEDIS.org
- iv. "**Document**" means the information contained in any electronic file, which has been published by the Licensor's as AXMEDIS official document and listed in the web site mentioned above or available by any other means.
- v. "**Works**" means any works created by the licensee, which reproduce a Document or any of its part.

2. LICENCE

1. The Licensor grants a non-exclusive royalty free licence to reproduce and use the Documents subject to present terms and conditions (the **Licence**) for the parts that are own and proprietary property the of AXMEDIS consortium or its members.
2. In consideration of the Licensor granting the Licence, licensee agrees to adhere to the following terms and conditions.

3. TERM AND TERMINATION

1. Granted Licence shall commence on Acceptance Date.
2. Granted Licence will terminate automatically if licensee fails to comply with any of the terms and conditions of this Licence.
3. Termination of this Licence does not affect either party's accrued rights and obligations as at the date of termination.
4. Upon termination of this Licence for whatever reason, licensee shall cease to make any use of the accessed Copyright.
5. All provisions of this Licence, which are necessary for the interpretation or enforcement of a party's rights or obligations, shall survive termination of this Licence and shall continue in full force and effect.
6. Notwithstanding License termination, confidentiality clauses related to any content, document or part of it as stated in the document itself will remain in force for a period of 5 years after license issue date or the period stated in the document whichever is the longer.

4. USE

1. Licensee shall not breach or denigrate the integrity of the Copyright Notice and in particular shall not:
 - i. remove this Copyright Notice on a Document or any of its reproduction in any form in which those may be achieved;
 - ii. change or remove the title of a Document;
 - iii. use all or any part of a Document as part of a specification or standard not emanating from the Licensor without the prior written consent of the Licensor; or
 - iv. do or permit others to do any act or omission in relation to a Document which is contrary to the rights and obligations as stated in the present license and agreed with the Licensor

5. COPYRIGHT NOTICES

1. All Works shall bear a clear notice asserting the Licensor's Copyright. The notice shall use the wording employed by the Licensor in its own copyright notice unless the Licensor otherwise instructs licensees.

6. WARRANTY

1. The Licensor warrants the licensee that the present licence is issued on the basis of full Copyright ownership or re-licensing agreements granting the Licensor full licensing and enforcement power.
2. For the avoidance of doubt the licensee should be aware that although the Copyright in the documents is given under warranty this warranty does not extend to the content of any document which may contain references or specifications or technologies that are covered by patents (also of third parties) or that refer to other standards. AXMEDIS is not responsible and does not guarantee that the information contained in the document is fully proprietary of AXMEDIS consortium and/or partners.
3. Licensee hereby undertakes to the Licensor that he will, without prejudice to any other right of action which the Licensor may have, at all times keep the Licensor fully and effectively indemnified against all and any liability (which liability shall include, without limitation, all losses, costs, claims, expenses, demands, actions, damages, legal and other professional fees and expenses on a full indemnity basis) which the Licensor may suffer or incur as a result of, or by reason of, any breach or non-fulfillment of any of his obligations in respect of this License.

7. INFRINGEMENT

1. Licensee undertakes to notify promptly the Licensor of any threatened or actual infringement of the Copyright which comes to licensee notice and shall, at the Licensor's request and expense, do all such things as are reasonably necessary to defend and enforce the Licensor's rights in the Copyright.

8. GOVERNING LAW AND JURISDICTION

1. This Licence shall be subject to, and construed and interpreted in accordance with Italian law.
2. The parties irrevocably submit to the exclusive jurisdiction of the Italian Courts.

Please note that:

- You can become affiliated with AXMEDIS. This will give you the access to a huge amount of knowledge, information and source code related to the AXMEDIS Framework. If you are interested please contact P. Nesi at nesi@dsi.unifi.it. Once affiliated with AXMEDIS you will have the possibility of using the AXMEDIS specification and technology for your business.
- You can contribute to the improvement of AXMEDIS documents and specification by sending the contribution to P. Nesi at nesi@dsi.unifi.it. You can attend AXMEDIS meetings that are open to public, for additional information see WWW.AXMEDIS.org or contact P. Nesi at nesi@dsi.unifi.it

INTRODUCTION

Dear AXMEDIS user,

Welcome to *AXMEDIS ActiveX Manual*, the official training workbook for the program that has as main aim to play rich and interactive content.

With this guide, the AXMEDIS team is hoping to help users to play easily AMEDIS objects to show how simple and powerful this tool is.

AXMEDIS is a very complex and complete world and it is very difficult to cover all the aspects in only one manual.

Remember to not hesitate to contact the AXMEDIS team if you need additional information or to point out mistakes in this manual. Also don't hesitate to visit the AXMEDIS portal where you can find many other information regarding the AXMEDIS technology, with many real examples and objects.

OVERVIEW

This document aim is to describe the User Manuals of AXMEDIS ActiveX Player.

AXMEDIS ACTIVEX PLAYER

MAIN FUNCTIONALITIES

The AXMEDIS ActiveX can be used to visualize and use AXMEDIS Objects inside MS Windows applications or inside web browsers.

The ActiveX exposes a set of functionality allowing to:

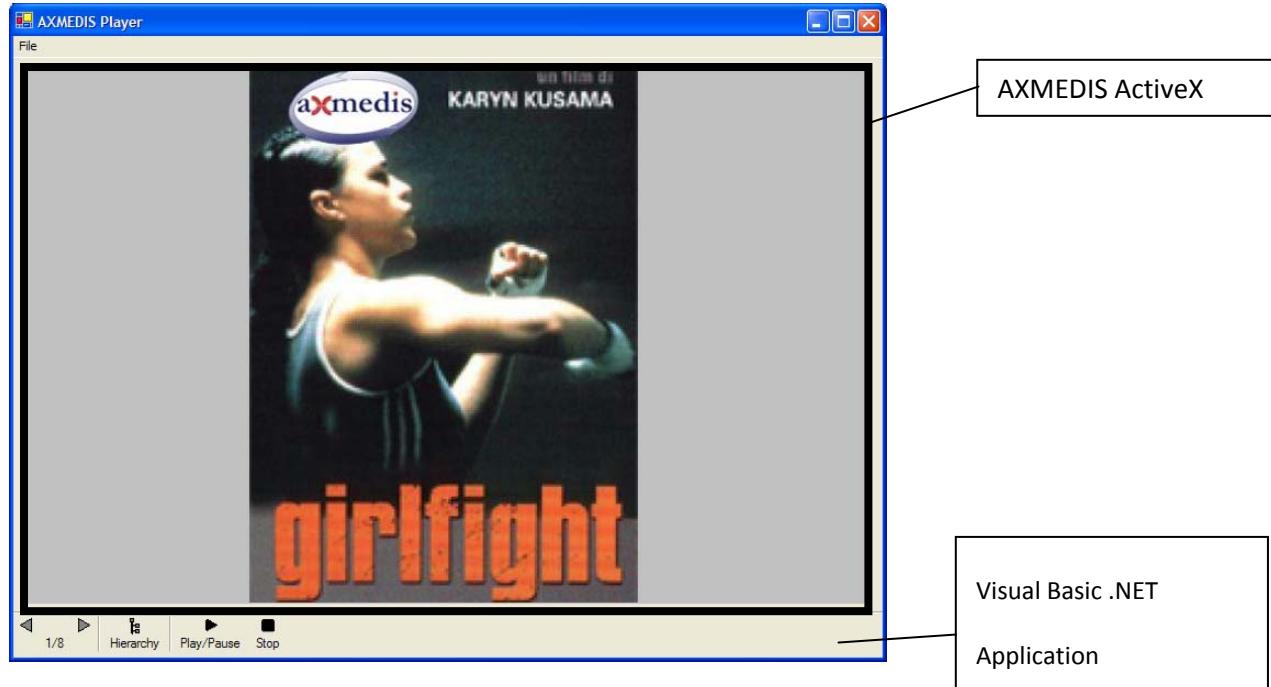

- open an AXMEDIS object from file system or from an URL (downloading)
- access to some information on the AXMEDIS Object, (e.g. content count, content mimetype)
- visualize the content that is present inside the AXMEDIS Object.
- control the visualization of the content (play, pause, stop, etc.)
- hide/show the hierarchy view of the object
- visualize the Dublin Core Metadata of the whole object
- show the licence available for the user on the object (not yet available)

RELATIONSHIP WITH OTHER TOOLS

None

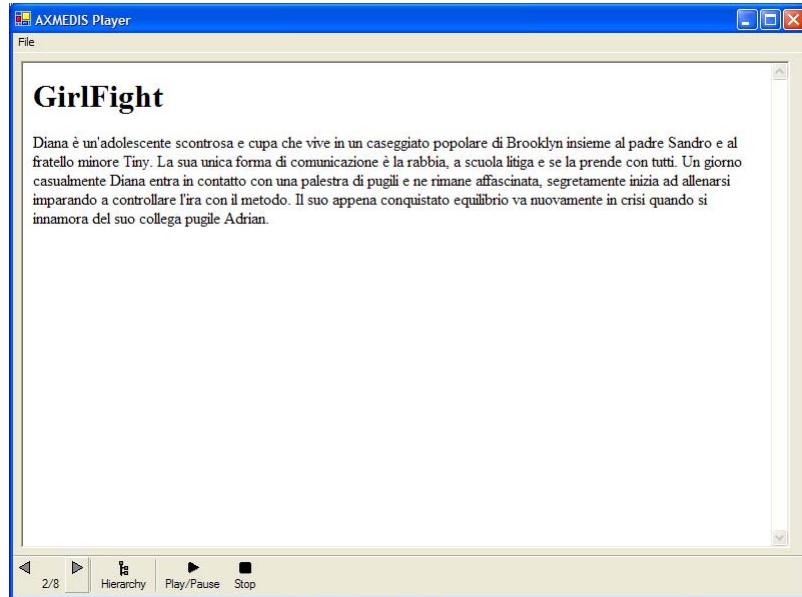

DETAILED DESCRIPTION OF THE FUNCTIONALITIES AND SCREENSHOTS

The following pictures show the use of the AXMEDIS ActiveX inside a Visual Basic Application implementing a basic player. The ActiveX user interface does not present any button controls to allow the customization of the user interface, the visual area is used to display the resources.

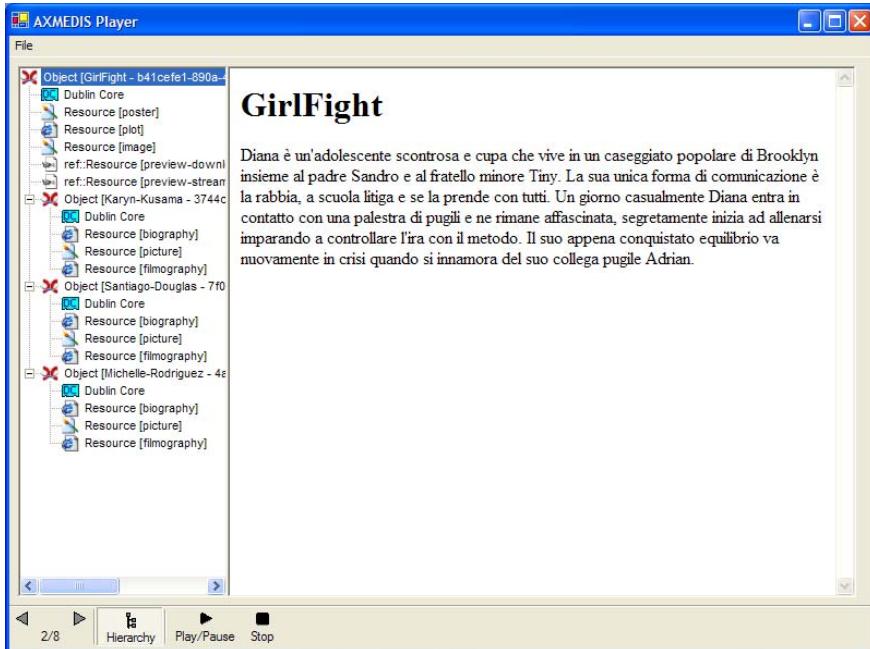

The Left and Right arrow buttons (defined in the VB application) use the *OpenContent(n)* method of the ActiveX to open a specific content stored in the AXMEDIS object, the Hierarchy button use the *ViewHierarchy* property to view/hide the AXMEDIS Hierarchy, the Play/Stop button use the *Play/Stop* methods to control the execution of Audio/Video resources.

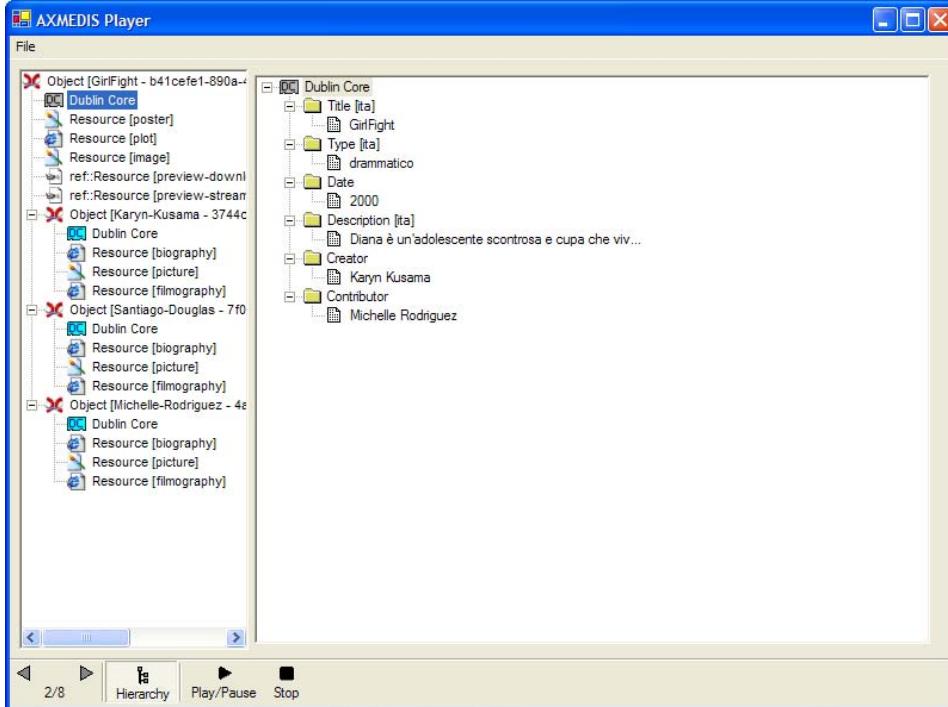

For example clicking on the Right arrow the second resource is shown (the movie plot):

and clicking on the Hierarchy Button the hierarchy is shown:

Double clicking on the Dublin Core element the Metadata is shown:

AXMEDISVIEWERCTRL

BASIC INTERFACE

Method Load	
<i>short Load(string url)</i>	
Description	Loads and AXMEDIS object from an URL or from file system, it tries to open the first SMIL resource available or otherwise the first Resource/AXObject available
Input parameters	<ul style="list-style-type: none"> • <i>string url</i> – the url or file to be opened (e.g. "http://AXMEDIS.org/demo/demo1.axm", "c:\AXMEDIS-objects\test.axm"), protocols supported are be http and ftp,
Return value	returns 0 if the object can be successfully loaded, 1 if the object cannot be loaded, 2 if the content cannot be opened (missing license)
Remarks	In case of load failure an empty object is present
Property ContentCount (read only)	

<i>short ContentCount</i>	
Description	number of content elements (resources/axobjects) at the first level
DefaultValue	0
Property BackgroudColor (read write)	
<i>string BackgroundColor</i>	
Description	the colour to be used as background (e.g. "#ffffff" for white)
DefaultValue	"#ffffff"
Property ViewHierarchy (read write)	
<i>bool ViewHierarchy</i>	
Description	indicates if the AXMEDIS Hierarchy view has to be shown or not.
DefaultValue	False
Method GetContentType	
<i>string GetContentType(short contentPos)</i>	
Description	allows to get which kind of content is present at a specific position (1..ContentCount)
Input parameters	<ul style="list-style-type: none"> • <i>short contentPos</i> – position of the content to be analyzed
Return value	returns "RESOURCE" or "AXOBJECT"
Remarks	In case of invalid position returns ""
Method GetContentMimeType	
<i>string GetContentMimeType(short contentPos)</i>	

Description	allows to get the mimetype of content at a specific position (1..ContentCount)
Input parameters	<ul style="list-style-type: none"> • <i>short contentPos</i> – position of the content to be analyzed (1..ContentCount)
Return value	returns a mimetype for a resource and the mimetype of the resource really played in case of an embedded AXMEDIS object (e.g. it can return "application/smil" if the object contains a SMIL resource)
Remarks	In case of invalid position returns ""
Method OpenContent	
<i>void OpenContent(short contentPos)</i>	
Description	<p>allows to open a content at a specific position (0..ContentCount), position 0 means the object itself. If the content to be opened is an AXMEDIS object it:</p> <ul style="list-style-type: none"> - runs the first method with autorun set to true - otherwise opens the first smil resource found - otherwise opens the first html resource found - otherwise opens the first resource
Input parameters	<ul style="list-style-type: none"> • <i>short contentPos</i> – position of the content to be opened (0..ContentCount)
Return value	None
Remarks	None
Method ShowMetadata	
<i>void ShowMetadata()</i>	
Description	allows to show the metadata of the whole object (using Dublin Core information)
Input parameters	None
Return value	None
Remarks	None

Method ShowLicense	
<i>void ShowLicense()</i>	
Description	allows to show the license available on the object
Input parameters	None
Return value	None
Remarks	Not yet available
Property NeedLicense (read only)	
<i>bool NeedLicense</i>	
Description	Indicates if a license is needed to view the object
DefaultValue	False
Property HaveLicense (read only)	
<i>bool HaveLicense</i>	
Description	Indicates if is available a license to view the object
DefaultValue	False
Remarks	Not yet available
Property AXOID (read only)	
<i>string AXOID</i>	
Description	Indicates the AXOID of the opened object
DefaultValue	""

Property AXUID (read only)	
<i>string AXUID</i>	
Description	Indicates the AXUID (user identifier) that registered the activex, this AXUID is used when performing actions under DRM. If empty means that the activex it is not bound to an user and operations under DRM will fail.
DefaultValue	""
Remarks	It is set using the ImportUserCertificate method
Method ImportUserCertificate	
<i>short ImportUserCertificate(string certificatePath, string password)</i>	
Description	allows to bound the activex with an user via a user certificate.
Input parameters	<ul style="list-style-type: none"> • <i>string certificatePath</i> – the path to a local file containing a PKCS12 certificate identifying the user • <i>string password</i> – password of the certificate
Return value	Returns 0 when fails
Remarks	The password is stored in the activex configuration, the configuration is saved when the activex is unloaded
Method Certify	
<i>short Certify()</i>	
Description	allows to register on the AXCS server via PMS the tool and to obtain a certificate identifying the tool.
Input parameters	None
Return value	Returns 0 when fails
Remarks	If the tool is already certified this method does nothing. The activex have to be certified to perform actions under DRM otherwise they fail.

VISUAL CONTROL INTERFACE

Property SupportVisualControl (read only)	
<i>bool SupportVisualControl</i>	
Description	indicates if for the currently opened content the visual control methods can be used
DefaultValue	False
Property Zoom (read write)	
<i>double Zoom</i>	
Description	is the zoom factor to be applied (1 = 100%)
DefaultValue	False
Remark	if the zoom factor is changed the AutoFit property is set to false
Property AutoFit (read write)	
<i>bool AutoFit</i>	
Description	when true indicates to resize the visual content to be fitted inside the window
DefaultValue	True
Remark	None
Method Fit	
<i>void Fit(double width, double height)</i>	
Description	fits the zoom factor to display the image at the desired size (keeping aspect ratio)
Input parameters	<ul style="list-style-type: none"> • <i>double width, height</i> - the image size in pixels

Return value	None
Remarks	the AutoFit property is set to false
Method FitToWindow	
<i>void FitToWindow()</i>	
Description	fits the visual content to the size of the image
Input parameters	None
Return value	None
Remarks	the AutoFit property is maintained
Method ZoomIn	
<i>void ZoomIn(double perc)</i>	
Description	Increments the zoom factor of the given percentage
Input parameters	<ul style="list-style-type: none"> • <i>double perc</i> – the percentage used to increment the zoom factor (e.g. 10 for 10%)
Return value	None
Remarks	the AutoFit property is set to false
Method ZoomOut	
<i>void ZoomOut(double perc)</i>	
Description	Decrements the zoom factor of the given percentage
Input parameters	<ul style="list-style-type: none"> • <i>double perc</i> – the percentage used to decrement the zoom factor (e.g. 10 for 10%)

Return value	None
Remarks	the AutoFit property is set to false
Property FullScreen (read write)	
<i>bool FullScreen</i>	
Description	when true switch to full screen mode
DefaultValue	False
Remark	None

TIME CONTROL INTERFACE

Property SupportTimeControl (read only)	
<i>bool SupportTimeControl</i>	
Description	indicates if for the currently opened content the time control methods can be used
DefaultValue	False
Method Play	
<i>void Play()</i>	
Description	Starts playing the content or continue in case of pause
Input parameters	None
Return value	none
Remarks	has no effect if it is already playing
Method Pause	

<i>void Pause()</i>	
Description	Pause the execution or continue execution
Input parameters	none
Return value	none
Remarks	none
Method Stop	
<i>void Stop()</i>	
Description	Stops execution
Input parameters	none
Return value	none
Remarks	none
Method JumpToTime	
<i>void JumpToTime(ulong time)</i>	
Description	Set the execution time in milliseconds
Input parameters	<ul style="list-style-type: none"> • <i>ulong time</i> – the time at which jump the execution
Return value	none
Remarks	none
Property IsPlaying (read only)	

<i>bool IsPlaying</i>	
Description	indicates if the content is being played
DefaultValue	false
Property Duration (read only)	
<i>ulong Duration</i>	
Description	indicates duration in milliseconds
DefaultValue	0
Property CurrentTime (read only)	
<i>ulong CurrentTime</i>	
Description	indicates current execution time in milliseconds
DefaultValue	0
Property StartTime (read write)	
<i>ulong StartTime</i>	
Description	indicates the time in milliseconds where to start
DefaultValue	0
Property EndTime (read write)	
<i>ulong EndTime</i>	
Description	indicates the time in milliseconds where to end execution
DefaultValue	Duration

GENERIC COMMAND INTERFACE

This interface allows executing commands giving a command identifier. The command identifiers are:

Command ID	Value
"Load"	string with the URL
"OpenContent"	content position
"ContentCount"	
"BackgroundColor"	string
"ShowMetadata"	none
"ShowLicense"	none
"NeedLicense"	bool
"HaveLicense"	bool
"Zoom"	double
"ZoomIn"	double
"ZoomOut"	double
"AutoFit"	
"Fit"	string "w,h" (e.g. "100, 400")
"FullScreen"	bool
"Print"	none

"Play"	none
"Stop"	none
"Pause"	none
"IsPlaying"	bool
"CurrentTime"	ulong (read only)
"Duration"	ulong (read only)
"StartTime"	ulong
"EndTime"	ulong

Method execCommand	
<i>HRESULT execCommand(string cmdID, bool showUI, variant value, bool* ret)</i>	
Description	executes the command described in cmdID, with an optional argument contained in value
Input parameters	<ul style="list-style-type: none"> • <i>string cmdID</i> – command to be done • <i>bool showUI</i> – indicates if UI update is needed • <i>variant value</i> – the argument for the command • <i>bool* ret</i> – contains if the command has been executed or not
Return value	S_OK if ok
Remarks	None
Method queryCommandEnabled	
<i>HRESULT queryCommandEnabled(string cmdID, bool* ret)</i>	
Description	looks if the specified command can be successfully executed in the current context
Input parameters	<ul style="list-style-type: none"> • <i>string cmdID</i> – command to be checked • <i>bool* ret</i> – contains the result (true if the command is enabled)

Return value	S_OK if ok
Remarks	None
Method queryCommandIndeterm	
<i>HRESULT queryCommandIndeterm(string cmdID, bool* ret)</i>	
Description	looks if the specified command is in the indeterminate state
Input parameters	<ul style="list-style-type: none"> • <i>string cmdID</i> – command to be checked • <i>bool* ret</i> – contains the result (true if the command is in the indeterminate state)
Return value	S_OK if ok
Remarks	None
Method queryCommandStatus	
<i>HRESULT queryCommandStatus(string cmdID, bool* ret)</i>	
Description	indicates if the specified command has been executed on the object or not
Input parameters	<ul style="list-style-type: none"> • <i>string cmdID</i> – command to be checked • <i>bool* ret</i> – contains the result
Return value	S_OK if ok
Remarks	None
Method queryCommandSupported	
<i>HRESULT queryCommandSupported(string cmdID, bool* ret)</i>	
Description	looks if the specified command is supported
Input parameters	<ul style="list-style-type: none"> • <i>string cmdID</i> – command to be checked • <i>bool* ret</i> – contains the result (true if the command is supported)

Return value	S_OK if ok
Remarks	None
Method queryCommandValue	
<i>HRESULT queryCommandValue(string cmdID, variant* ret)</i>	
Description	returns the current value for a command
Input parameters	<ul style="list-style-type: none"> • <i>string cmdID</i> – command • <i>variant* value</i> – contains value
Return value	S_OK if ok
Remarks	None

EXAMPLES OF USAGE

USING IN A .NET APPLICATION

The following is an example of use of the activex to make a preview of an AXMEDIS object:

```

axactivex=new AXMEDISViewerCtrl();
activex.BackgroudColor="#ffffff";

//open the object downloading it from an URL
activex.Load("http://www.axmedis.org/axmedis.axm");

//show the metadata of the whole object
activex.ShowMetadata();

//look for a license and if not present acquire it

```

```
if(axactivex.NeedsLicense && !axactivex.HaveLicense)

    axactivex.AcquireLicense(licenseID);

else

    axactivex.ShowLicense();

// open all content elements inside the object and make a preview for 10s each

for(int i=1; i<=axactivex.ContentCount; i++)

{

    axactivex.OpenContent(i);

    //if currently opened content is image/video/document fit it to 100x100 preview

    if(axactivex.SupportVisualControl)

        axactivex.fit(100,100);

    //if currently opened content is audio/video preview it for 10s other wise wait for 10s

    if(axactivex.SupportTimeControl)

        axactivex.EndTime=10000; //10s preview

    else

        wait(10000); //wait 10s

}
```

USING IN A HTML PAGE

The AXMEDIS activex can be used inside any HTML page using the OBJECT tag (the embed tag is for the Mozilla plugin)

```
<OBJECT id="Object1"

height="100%" width="100%" classid="clsid:B30B789D-2378-45BD-A1B5-AFC0B43919D3"

name="axviewer" VIEWASTEXT>

<PARAM NAME="SRC" VALUE="http://www.axmedis.org/axmedis.mp21">

<PARAM NAME="BGCOLOR" VALUE="#99ccff">

<embed id="axviewer" type="application/axmedisplayer-plugin"

width="100%" height="100%" viewHierarchy="false"> </embed>

</OBJECT>
```

The SRC parameter indicates the absolute URL to the .mp21/.axm file to load (it also opens the default resource like in OpenContent(0)) and the BGCOLOR parameter indicates the background color to use.

```

<script>

var axviewer;

if (document.embeds != null && document.embeds.length > 0) {

    //mozilla
    axviewer = document.getElementById('axviewer');

} else {

    // IE
    axviewer = document.all['axviewer'];

}

...
function load() {

    var filename = document.all["File1"].value;
    if(filename != null && filename!="") {

        axviewer.load(filename);

        if(axviewer.needsLicense)

        {

            if(axviewer.AXUID==" ")

                alert("You need to be a registered user to use the content");

            else

                axviewer.certify();

        }

        content=1

        //if in the content there is a smil or html file disable the next/prev buttons

        var n=axviewer.ContentCount;

        if(n>0)

        {

            indexFound=false;

            for(i=1; i<=n; i++)

```

```
        if(axviewer.GetContentMimeType(i)=="application/smil" ||  
           axviewer.GetContentMimeType(i)=="text/html")  
            indexFound=true;  
  
        next.disabled=indexFound;  
        prev.disabled=indexFound;  
        axviewer.openContent(0); //content=0 means open the default resource  
    }  
}  
}  
...  
  
function ShowInfo() {  
    var n=axviewer.ContentCount;  
    var msg = "AXOID: "+axviewer.AXObjectID+"\n"  
    for(i=1; i<=n; i++)  
        msg += "    "+axviewer.GetContentType(i)+" "+axviewer.GetContentMimeType(i)+"\n";  
  
    alert(msg+"\nUser ID: "+axviewer.AXUID+"\nNeeds license: "+axviewer.needsLicense);  
}
```
